netbox labs

Project Bundles for Partners

Easily Use Any NetBox Enterprise or NetBox Cloud License in Your Network Projects

With Project Bundles for Partners, registered NetBox Labs Expert Partners can access any edition and tier of NetBox Enterprise or NetBox Cloud for free during the design and implementation phases of projects for their clients, and seamlessly transition the license to the client at project handoff with standard commercial terms. Deploy quickly and easily, access every advanced feature, and take advantage of support and assistance from the experts at NetBox Labs.

The Benefits of NetBox in Network Projects

- **Design your client's network with confidence** – Leverage NetBox's comprehensive and cohesive network data model to lay out and validate your network designs, reducing project risk.

- **Accelerate implementation with modern network automation** – Employ NetBox as the network source of truth and automate deployment and configuration – nearly every network automation tool works with NetBox.

- **Deliver operational network automation for your clients** – NetBox is at the center of modern network automation architectures, with a massive integration ecosystem powered by NetBox Labs technology alliances and the community.

- **Living documentation of your project** – Stop handing clients PDFs at project hand-off, and give them NetBox instead, documenting exactly what's been delivered and how it's configured in an operational network source of truth.

What is NetBox?

NetBox is the world's most popular platform for documenting, modeling, and automating networks and infrastructure. Powered by a massive open source community, NetBox serves as the source of truth for tens of thousands of engineers—from growing organizations to Fortune 50 companies.

NetBox's comprehensive data model, robust APIs, and massive ecosystem make documenting and automating networks and infrastructure easy by bringing together all your data into a single cohesive system of record:

- Datacenter infrastructure management (DCIM)
- IP address management (IPAM)
- Circuit management
- And much more

NetBox Edition	NetBox Community	NetBox Enterprise	NetBox Cloud

What Do I Get With Project Bundles?

- ☑ Full access to any NetBox Enterprise or NetBox Cloud plan for a project design phase (3 months standard)

- ☑ Access to enterprise grade support and best practices assistance from the NetBox Labs team

- ☑ Seamless transfer of the appropriate commercial license for the end customer at project hand-off

- ☑ Included NetBox Labs training seats for end customers to maximize their benefits from NetBox

Becoming a NetBox Labs Expert Partner

We love consulting, integrator, reseller, and MSP partners at NetBox Labs. Why should you partner with us?

- ☑ Access to training, support, and other resources – we're here to help you with NetBox

- ☑ Unique product and roadmap insights – get direct engagement with our product team

- ☑ Access to Project Bundles for Partners – remove risk and accelerate your network projects

- ☑ Perfectly aligned – NetBox Labs is a product company, and we don't compete with our partners on services

"

NetBox is the de facto standard for documenting, modeling, and automating networks and we frequently use NetBox in our projects for clients at Nomios. NetBox Labs has demonstrated time and again they're a great vendor for partners to work with.

Steve Maloney
Regional Sales Director at Nomios UK&I
